

Graffiti Repair And Security Glass

Glass makes a beautiful facade but it comes under threat of attack and vandals. Special glass and film solutions can dramatically reduce the damage caused to your home, shop or office.

Etching and graffiti

Have you been the target of glass etched graffiti? Or are you looking to protect your glass from this threat?

- If you've already been tagged, it may be possible to buff the graffiti off the glass. This can reduce the strength of the glass and may make it a danger. An Express Glass glazier can say whether buffing is the right solution for you.
- If you are looking for a low cost solution for graffiti, applying anti-graffiti film to the outside of your windows may be the answer. If taggers manage to damage the film, replacing it is easy and cost-effective... you no longer need to replace your entire window.

Vandalism and security:

- Security glass is multi-layered and/or toughened glass specially treated to withstand a range of violent attacks. From a brick to a bomb, security glass will hold together against most attacks.
- There are glass and film products we can recommend to protect your property.

To find out more about how your premises can benefit from security glass and film, contact Express Glass today.
